

Wild Flowers

These are some photos of plants that you can find flowering on the farm trail during the spring, summer and autumn. You will need to look carefully because some of the flowers are in only one place.

Name each of the flowers in the pictures and put a tick in the box if you find one.

Farm Trail Walks

Farm walks, guided by the staff of Elm Farm Organic Research Centre, are arranged at different times of year. Please visit our website for details of planned walks and other activities.

The Organic Farm Trail at Elm Farm

The Farm Trail Explorer

for younger visitors

You can use this explorer leaflet to discover some facts about Elm Farm and the wildlife on the farm.

You will need a pen or pencil to make a note of your answers to the explorer questions as you walk round the trail.

The trail is a permissive path, open to the public throughout the year. Children should always be accompanied by an adult.

The Farm Trail

- Roads

The Farm Trail Explorer Challenge

On this and the next two pages there are two Explorer Challenges for you to complete as you go round the trail.

At the end of the trail you will find a leaflet in a dispenser giving answers to the questions.

Berries, Fruits and Nuts

In summer and autumn you can find at least 6 different kinds of berries, fruits and nuts on the bushes and trees that you see on your way round the farm trail. Draw a line to join the tree or bush in the list with the berry or nut that grows on it.

- | | |
|-------------------|-------------------|
| Bramble | Acorn |
| Hawthorn | Hip |
| Dog rose | Sloe |
| Oak | Blackberry |
| Blackthorn | Cobnut |
| Hazel | Haw |

Try to find all of the berries and fruits as you go round the trail.

July, August, September and October are the best times to find them all.
