

Potential collaboration - Organic Research Centre

Dr. Lindsay Whistance and Mr. Rowan Dumper-Pollard

Biotour feedback: ORC experience

Knowledge Exchange: Learning and Sharing agroecological practices

Matt Smee

Agricology Project Manager

Economic sustainability in organic farming and food production

Organic business advice and financial data

Consumer research: understanding shopping habits and intentions

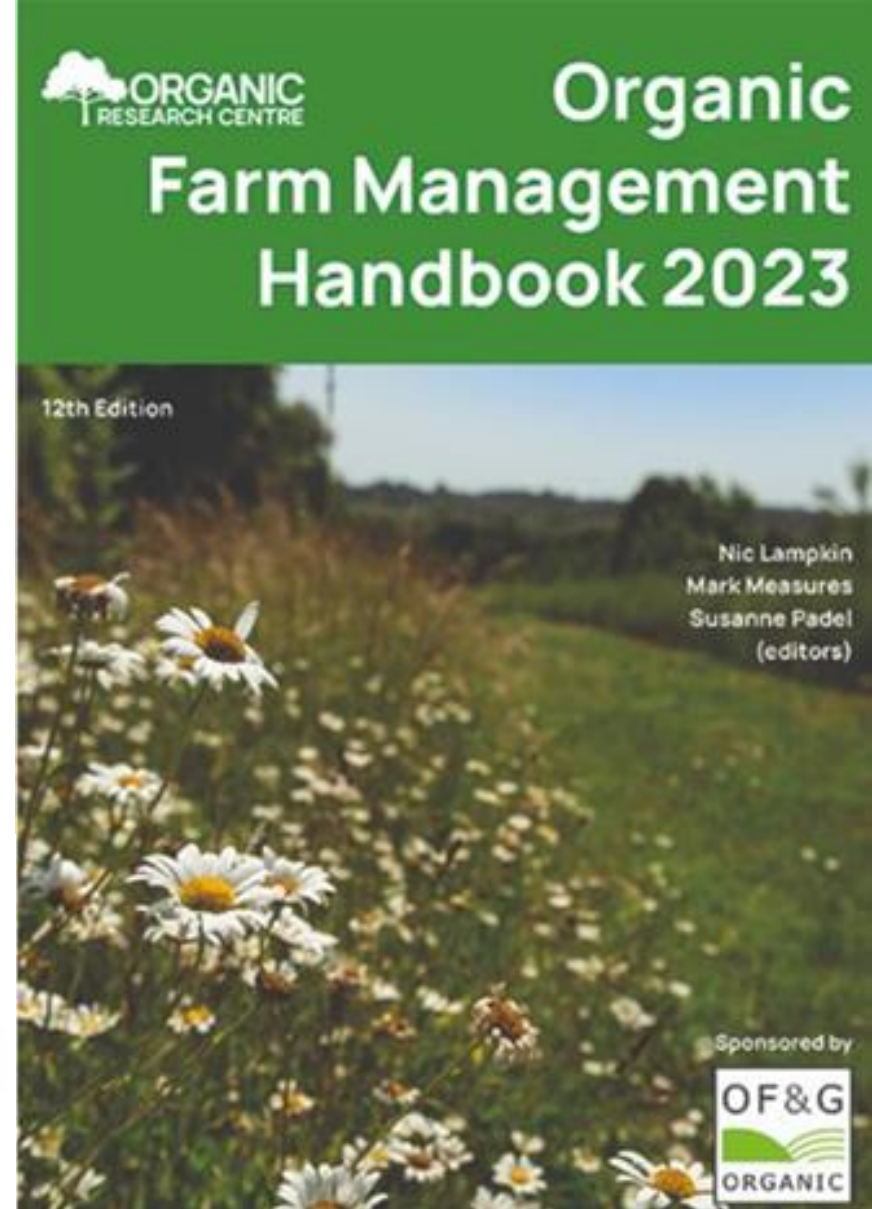

Strategies for sustainable markets

Influence policy

Rowan Dumper-Pollard

Organic Business And
Markets Researcher

Agroforestry

Decision support tools:
facilitating agroforestry practices

Modelling and monitoring public
goods

Hedgerows and shelterbelts

Resilience and adaptation to
climate change

Will Simonson
Principal Researcher,
Agroforestry

Collin Tosh
Senior Agroforestry
Researcher

Livestock

Lives worth living:

Human-animal relationships

Enriched landscapes

Balancing:
animal/production/ecology

Silvopastoral systems

Tree fodder

Lindsay Whistance

Senior Livestock
Researcher

Crops

Increase and optimise use of functional agrobiodiversity

Diverse cereal seed (increasing genetic diversity for crop resilience)

Diverse cropping (intercropping and increasing legumes in production)

Living mulches (long-term understories for nitrogen fixation, soil health, weed control)

Charlotte Blekler

Principal Researcher And
Knowledge Exchange
Manager – Crop
Diversification

Soil

Soil health and food production

Balancing nutrient cycles

Fertility building with organic amendments

Tillage in organic systems

Julia Cooper

Head Of Research

Thank you.
